I'm making a kivy application where I need to click in a different window. I did so by importing mouse. At first I tried to use the function on_touch_listen(). I just created a canvas with size_hint=(None, None) and tried to set the on_touch_listen method to a method that is called when my on_touch_listen is pressed. But it only works the first time, after that it only reacts when the on_touch_listen method is called again. I think my program somehow forgets what I previously set. How can I fix this? I would really appreciate your help, thanks! Here is my code: from kivy.app import App from kivy.uix.widget import Widget from kivy.graphics import Color, Rectangle, Ellipse from kivy.graphics.context_instructions import Color, Rectangle, Ell 82157476af
